

# TRONOOO/TENDER WHITEPAPER

## v1.0.1

TRONOOO is a social experiment to help create new and innovative methods of delivering instant financial aid to near and remote areas of the world without bureaucracy and limitations. TRONOOO is freely distributed at no charge.

TRONOOO can be staked to create the TENDER token. TENDER tokens are not limited to; but are given or traded to and on behalf of individuals and organizations requiring immediate funding related to and applied to life essentials such as fundamental living requirements, food, housing and associated needs to assist or increase the well being of those in need.

### **TRONOOO's Spirit**

The message of health, wealth, and happiness along with positive reinforcement has resulted in the wide distribution of TRONOOO. Over 1,000,000,000 TRONOOO tokens have been freely distributed to those supporting the good-natured idea of assisting those in need. Sharing and caring have been the ongoing mantra of TRONOOO participants.

### **TRONOOO's Vision**

It is the intention of the TRONOOO founders to continue distribution of tokens to those with a likeminded attitude towards helping fund global projects to enhance the wellness of those less fortunate.

### **TRONOOO's Future**

What the future holds for TRONOOO is uncertain and remains in the hands of its supporters. Founders remain committed to this philanthropic project with or without the support of the community, however, should lack of support deem it impossible to continue due to lack of interest, an uncertain outcome may arise.

## **I. TRONOOO Issuance**

The total TRONOOO token supply is 3,088,286,401.

## **II. TRONOOO Distribution**

Over 1,000,000,000 tokens have been freely distributed to over 16,000 Tron wallet holders as of this whitepaper publishing. The remaining TRONOOO tokens will continue to be freely distributed by way of bounties, contests, rewards, and a variety of other philanthropic activities. Should TRONOOO tokens become scarce, founders may choose to repurchase TRONOOO tokens in the marketplace if a viable option.

## 1. Mining Method

**Mining:** Users can participate in mining by staking accrued TRON000 tokens. Staking occurs on the official TRON000 token website [tron.ooo](https://tron.ooo). Staking and/or mining TRON000 tokens yield TENDER tokens. TENDER tokens are exclusively minted by staking TRON000 tokens.

## 2. Mining Timeline

TRON000 Mining will formally begin on December 25, 2020 at midnight and will continue indefinitely or until interest in such experiment no longer becomes viable.

## 3. Mining Reward

**Mining:** By staking the freely distributed TRON000 token, 10 TENDER tokens will be minted daily and shared accordingly to the TRON000 staking amount of a staker. 90% of the TENDER token yield is specifically held for distribution to individuals and organizations requiring immediate funding for life essentials such as fundamental living requirements, food, housing and related needs to assist or increase the wellbeing of those in need. 8% of TRON000 staking yield is rewarded to the staker while the remaining 2% is rewarded to the TRON000/TENDER founders for further token distribution, awareness programs and other needed activities. No stake in or out fees are charged.

## 4. Mining Fairness

**FOUNDING TRON000** tokens remaining to be distributed will not be staked to earn TENDER tokens. Only widely distributed TRON000 tokens are eligible to stake.

## 5. Mining Security

The smart contract source code of TENDER is verified and available for viewing.

# III. Roadmap

## Phase 1: Distribution

It is the mandate of the founders and affiliates to further the distribution of TRONOOO tokens widely and to all demographics to maintain a balanced distribution democracy well into the future.

**Phase 2: Accrued Tender token**

Founders and affiliates of TRONOOO tokens as well as TENDER token holders will jointly decide the distribution of TENDER tokens and/or converted/monetized TENDER tokens to those in need.

**Phase 3: Liquidity**

TRONOOO is currently paired with TRX, DOGE, ETH and USDT on the Cctip.io cryptocurrency exchange service. TENDER token is paired with TRX on the JustSwap.io cryptocurrency exchange service. Liquidity is also achieved by way of designated Ambassador's. An Ambassador earns TRONOOO tokens for assisting in promoting and securing liquidity providers. Liquidity providers are individuals and organizations finding value in the philanthropic targeted distribution efforts of TRONOOO and TENDER founders and its participants.

**Phase 4: Bounties**

Bounties are given to those who actively participate in building awareness of activities related to the initiatives of TRONOOO and TENDER. Activities can include, but are not limited to, distribution, regional donor solicitation, introductions, graphic design, software development and marketing among other contributions.
